

Top 5% Authors, Number of Downloads through RePEc Services over the past 12 months, Weighted by Number of Authors, as of December 2017

What this page is about

This page is part of a larger set of rankings for research items, serial, individuals and institutions made available on this site. A FAQ is available. Additional detail specific to this particular ranking are:

- Only authors registered with the RePEc Author Service are considered.
- Only works listed on RePEc and claimed as theirs by registered authors are counted.
- Number of downloads in the past 12 months (January 2017-December 2017) from the various RePEc sites (IDEAS, EconPapers, Socionet, NEP). For details, see LogEc.
- The score of each work is divided by the number of authors.
- There are 51795 registered authors evaluated for all the rankings.

The data presented here is experimental. It is based on a limited sample of the research output in Economics and Finance. Only material catalogued in RePEc is considered. For any citation based criterion, only works that could be parsed by the CitEc project are considered. For any ranking of people, only those registered with the RePEc Author Service can be taken into account. And for rankings of institutions, only those listed in EDIRC and claimed as affiliation by the respective, registered authors can be measured. Thus, this list is by no means based on a complete sample. You can help making this more comprehensive by encouraging more publications to be listed (instructions) and more authors to register (form). For more details on the various rankings that are available as well for documentation, follow this link.
